

### Effective and Safe Bio-Protection for Cannabis & Indoor Cultivation

For more than 30 years OmniAire products have provided protection against some of the most dangerous contaminants. The OmniAire 600 Nitro is used in highly sensitive environments at risk of bio-contamination such as cannabis drying, trimming and packaging areas. This unit provides HEPA filtration to capture impurities as small as 0.3 microns, maintaining a high level of air sanitation. The replaceable pre-filter traps larger particles, including many types of pollens, while the HEPA filter captures smaller particles. The Nitro a is portable and efficient solution for your operation.

**The use of HEPA filtration keeps your facility and employees safe from pollutants**

#### OMNIAIRE 600 NITRO CAPTURES

airborne particulates 0.3 $\mu$  including pollens, mold spores and other harmful contaminants

CONFORMS TO UL STD 507  
CERTIFIED TO CAN/CSA STD  
C22.2 NO. 113-M1984

### OA600N

<b>Airflow</b>	200 - 600 CFM*, variable speed control
<b>Power Requirements</b>	115 VAC/60 Hz/2.4 amps
<b>Recessed Controls</b>	variable speed control, change filter light, GFI protected outlet (8 amps load max)
<b>Filtration</b>	HEPA Filter 99.99%, 0.3 $\mu$ MERV 8 primary/secondary filter
<b>Housing**</b>	polyethylene, 12" outlet
<b>Size/Weight</b>	25"W x 19"H x 19"L, 36 lbs.

\*Airflows based on blower manufacturer curves. Different filters may cause the flow to vary.
